

Project Writeup

Project Name: Employee Record File Handling

Project Description:

In this project we are going to handle Employee data as Adding new employee records, viewing all employee details, deleting employee records, searching for an employee record, Update a specific employee record.

To do all these operations we are storing the entire data in a text file named "Records.txt". to do the employee the following methods are used:

- i. Method to Adding new employee record.
- ii. Method to view specified employee records.
- iii. Method to delete specified employee record.
- iv. Method to search specified employee data.
- v. Method to update specified employee record.
- vi. Main method to implement all the above methods.
