Writeup: Product Details Portal

Project Name: Product Details Portal

Project Description: In the given code Created a Servlet based web application that shows a form to enter product details. In this I have designed a form for adding products into the system entered by the users. And the product is just captured and displayed without storing it anywhere. To develop this project the following are used:

- Eclipse as the IDE
- Apache Tomcat as the web server
- JSP pages for the front end
- Servlets for backend processing
